

De onderstaande standaardteksten zijn voor gebruik in wetenschappelijke publicaties waarin data uit de Nederlandse Kankerregistratie (NKR) worden gebruikt. Je kunt ze direct toepassen wanneer je studie uitsluitend NKR-data gebruikt. Als je NKR-data combineert met andere databronnen, dienen deze teksten als uitgangspunt en vul je waar nodig aan.

Methods – Tumour type with scientific committee

Oversight for the present study was provided by the Privacy Review Board and the NCR scientific committee ([aanvraagnummer invullen]).

Methods – Tumour type without scientific committee

Oversight for the present study was provided by the Privacy Review Board ([aanvraagnummer invullen]).

Data availability statement

The data that support the findings of this study are available from the Netherlands Comprehensive Cancer Organisation (IKNL). Data are used under licence for this study and therefore not publicly available. (Analytical) code(s) are available upon (reasonable) request in consultation with the corresponding author.

Ethics statement – Tumour type with scientific committee

This retrospective study was conducted using pseudonymised and aggregated data from the Netherlands Cancer Registry/Netherlands Comprehensive Cancer Organisation. Data release by the Netherlands Comprehensive Cancer Organisation is subject to strict regulations, with oversight provided by a Privacy Review Board and a scientific committee [aanvraagnummer]. According to Dutch legislation, this study does not fall within the scope of the Medical Research Involving Human Subjects Act (WMO) and therefore did not require approval from a medical ethics review committee.
